PM SKILLS

- Product Strategy & Roadmap
- Agile
- UX/UI Prototyping (Figma)
- Data-Driven Decision Making
- Customer Support & Feedback Loops

PROFILE

Product-oriented entrepreneur and developer specialized in driving the entire lifecycle of complex digital platforms. I combine a solid technical foundation with a transdisciplinary mindset stemming from my studies in Applied Philosophy. This unique combination allows me to analyze challenges from multiple perspectives and facilitate seamless communication between technical and business teams.

WORK EXPERIENCE

LumaUp sp. z o.o.

2024 - 2026

Co-Founder | Developer

- **CompraSocial.me:** Conceived, launched, and scaled a high-traffic digital platform based on WordPress with custom Vue.js integrations, successfully processing over 300,000 orders. Programmed integrated scripts to automate 90% of daily operations, drastically reducing business operational overhead time.
- **CosmicUp.me:** Defined the product roadmap and oversaw the technical development of a serverless web application (VueJS + NodeJS with Firebase) offering centralized access to popular AI models, rapidly scaling to support over 8,000 active users.
- Managed the entire growth funnel: from market analysis and UX/UI design (Figma) to marketing campaigns (TikTok & Google Ads) and direct customer assistance, successfully translating user feedback into new product features.

Tech Skills:

JavaScript | Vue.js | Node.js | Express | LLM | Rag | Codex | Antigravity | Claude Code | Langchain | PHP | AI Agent development | TikTok Ads | Google Ads | Cost Optimisation | Figma | Firebase | Customer assistance

Freelancer (Sole proprietorship)

2021 - 2023

Developer

- **CompraSocial.me**

Tech Skills:

JavaScript | Wordpress | PHP | SEO | MongoDB | MySQL

OPI - PIB

2019 - 2020

Angular Developer

- Led the frontend implementation of ela.nauka.gov.pl, translating complex graphic prototypes from Adobe XD into a highly responsive, accessible Angular interface.
- Conceived and developed a cross-platform mobile strategy utilizing the same web repository (via CapacitorJS), saving the institution over XX.000 PLN per year in development and maintenance costs.

Tech Skills:

JavaScript | Wordpress | PHP | SEO | MongoDB | MySQL | CapacitorJS

HUMAN SKILLS

- **Thinking before speaking:**
Strategic and logical analysis systematically applied to every decision before taking action.
- **Interdisciplinary Translator:**
A unique ability to seamlessly connect abstraction, technical code, and growth marketing.
- **Serial Optimizer:** Designing intelligent architectures and automations laser-focused on resource-saving and scalability.

WORK EXPERIENCE

Sollers Consulting

2018

Junior Java Developer

- Developed key sections of an insurance portal frontend (Angular), enabling customers to report car accident claims autonomously in a guided flow, optimizing the overall user experience.

Tech Skills:

Javascript | Angular | Gosu | Guidewire | UX/UI

EDUCATION

Bachelor in Applied Philosophy (In progress)

2024 - 202X

Università Niccolò Cusano

- Developing a solid critical, constructive, and transdisciplinary approach oriented toward solving complex problems. Focus on multiple perspectives and ethics applied to technological and evolutionary systems.

Bachelor in Computer Science (Not Completed)

2016 -2020

Polsko-Japońska Akademia Technik Komputerowych

- Four-year academic path focused on Software Engineering, data structures, and development, prior to transitioning full-time into active roles in the tech industry.
